Fire Rated Knitted Shade Fabric

Polytex® and Comtex® have been designed for shade structures and architectural shade sails. Their high strength to weight ratio, UV performance and fire ratings make them the ideal choice for residential or commercial shade projects.

Polytex and Comtex are available in many designer colors that block up to 96.9% of harmful UVA and UVB rays.

Polytex® by Polyfab

A superior fire rated knitted HDPE shade fabric designed for use in modular shade structures and shade sails. Recommended for residential and small commercial installations with unsupported spans of 25 feet or less.

Cappuccino
865129 Polytex

Comtex® by Polyfab

A superior fire rated knitted HDPE shade fabric designed for large tension membrane structures and architectural shade sails. Recommended for larger commercial installations with unsupported spans of up to 100 feet or any job if preferred.

Polytex and Comtex comply with the following fire codes:
ASTM E-84 Class A
California State Fire Marshal 13115
NFPA 701-2004

Polyfab shade cloth has excellent fade resistance but all outdoor fabrics are subject to gradual fading over time. Some colors have a tendency to fade more than others.
